Quilt Construction

1. Join the blocks together in the order shown in the main picture - the easiest way is to join 6 blocks in a row, repeat 6 times, then join the rows together. Blocks 1 and 2 are alternated throughout and rotated to create the weave effect. Be sure that the blocks are orientated correctly before sewing!

Tip: When you press the seams flat on each of the strips, press them in opposite directions on adjacent strips so they butt up against each other - this should make it easier to ensure the squares are sewn accurately - see figure 1.

2. Cut 2 strips 2.5 inches x width of fabric (WOF) of fabric 5. Join 1 strip to the top and one strip to the bottom of the quilt top and trim the ends.

3. Cut 2 strips 2.5 inches x WOF of fabric 5. Join 1 strip to each side of the quilt top and trim the ends to complete the border. The quilt top is now complete!

4. Sandwich the quilt top, wadding and backing together and baste or pin securely. Quilt as desired - this quilt design is a great opportunity to do some long, thin quilting designs to emphasise the weave pattern.

12. Trim the batting and backing to the size of the quilt top. Cut 5 2.5 inch x WOF strips of fabric 4 for the binding, join together and bind the quilt. The quilt is now complete - if you have any questions or queries please don't hesitate to contact us at Pelenna Patchworks!
